Summary

Builder at the intersection of AI and web engineering. Experienced in shipping real-time systems with WebRTC, Socket.io, and LLM integration (Whisper, LLaMA via Groq), with a strong full-stack foundation across Next.js, Node.js, and PostgreSQL. Studying ML from first principles – backprop through CNNs – with a focus on building AI-powered products, not just consuming APIs. Comfortable owning backend architecture end-to-end and coordinating across teams via clean API contracts.

Projects

NoJudgement – AI-Powered English Speaking Practice Platform *Next.js, WebRTC, Socket.io, Groq/Whisper, LLaMA, PostgreSQL, Prisma*

- Built the entire backend: peer matchmaking (with race-condition fixes on a singleton socket), WebRTC signaling, and chunk-based real-time STT pipeline using Whisper via Groq.
- Integrated LLaMA for post-call AI feedback on fluency and grammar; engineered streak tracking, points, and leaderboard for a complete gamification loop.
- Shipped automated reporting and auto-ban system; coordinated frontend integration across teammates via documented API contracts.

NoxlyAI – AI-Powered Note-Taking Workspace *Next.js 15, Gemini Pro, PostgreSQL, Prisma, Zustand, Tailwind* | noxly-coral.vercel.app

- Built a full-stack AI workspace with a context-aware Gemini Pro chat assistant that understands user notes and a magic toolbar for real-time AI rewrite, simplify, and expand operations on selected text.
- Engineered Next.js 15 App Router API with Edge-ready route handlers, JWT-based auth, encrypted password storage, and public share links with unique access controls.
- Integrated dynamic productivity analytics (weekly activity charts, tag distribution) and AI-suggested note titles with automatic state sync via Zustand.

Experience

Summer Intern – Software Developer May 2026 – Present
IFFCO (Indian Farmers Fertiliser Cooperative) India

- Contributing to enterprise-scale internal software development initiatives at one of India's largest cooperative organisations, applying full-stack web development and data-driven engineering practices.
- Involved in analysis, design, and implementation of technology solutions, leveraging modern web frameworks and analytical tooling to drive operational efficiency.
- Applying structured problem-solving, cross-functional collaboration, and agile workflows to deliver scalable, data-informed software solutions in a high-impact enterprise environment.

Graphics Design Intern Sep 2025 – Dec 2025
Technocrypt Pvt. Ltd. Remote, New Delhi

- Designed social media creatives, banners, and marketing materials aligned with brand guidelines for a software and web development company.
- Produced pitch decks, presentations, and UI mockups; adapted designs across digital and print formats.
- Collaborated with marketing and content teams to deliver campaign assets on deadline across multiple concurrent projects.

Web Developer Feb 2026 – Present
GDG KIIT Chapter Bhubaneswar, Odisha

- Architected real-time collaboration tools using Node.js, Express, Socket.io, and Supabase for the KIIT developer community (500+ members).
- Integrated Cloudinary media pipelines and Supabase authentication, optimizing upload and delivery workflows for community platforms.
- Built responsive event-driven portals in React, coordinating with cross-functional teams to consistently ship on deadline.

Technical Team Member – Web Developer May 2025 – Present
K-1000 Bhubaneswar, Odisha

- Built Cloudinary-based image management system (upload, delete, labeled fetch); refactored from API routes to Next.js server actions.
- Contributed to scalable backend architecture supporting full CRUD and media workflows across the platform.

- Coordinated with teammates via documented API contracts, ensuring clean frontend-backend integration in a distributed team.

Education

KIIT University <i>B.Tech – Computer Science (AI & ML)</i>	Aug 2024 – Present <i>Bhubaneswar, Odisha</i>
Kendriya Vidyalaya IFFCO Phulpur <i>Class XII – Computer Science</i>	2021 – 2023 <i>Prayagraj, Uttar Pradesh</i>

Technical Skills

Languages	JavaScript, Python, C++, Java, PHP
Web / Backend	Next.js, React, Node.js, Express.js, Socket.io, WebRTC, REST APIs, Laravel
AI / ML	CNNs, Backpropagation, Whisper (STT), LLaMA, Gemini Pro, Groq API, PyTorch, fast.ai, MNIST digit c
Databases	PostgreSQL, MongoDB, MySQL, Supabase, Prisma ORM
Tools	Git, GitHub, Cloudinary, Postman, VS Code, Adobe Creative Cloud
CS Fundamentals	DSA in C++ (~92 LeetCode), DBMS, OS, OOP, LLD (Parking Lot, LRU Cache)
